re.: Jaguar E Type Reg No. HPU 366 N

I have owned the above mentioned car from new and certify that the following brief history and details are correct.

The car was initially serviced by Mann Egerton who are Jaguar dealers, and sold me the car, but I felt that their servicing was not adequate, and subsequently the car was maintained by Dentune Eng. Ltd. whose report is attached.

The mileage of 16512 at the date of sale (as above) is absolutely genuine. The reason for the low mileage being that I am away from home for considerable times and that it has been my second car. During my absence the car has always been warmed up and run once a week to maintain lubrication and prevent seizure of moving parts.

There has never been any accident damage and the only mechanical fault of any significance was leaking differential seals at which stage I had the entire differential unit replaced.

The car was always been garaged and my only ~~reason~~ reason for the sale of this car is the purchase of another new property for which I need the money.
